

Dozuki Gold 240

The top saws from the Gold series. The series with even thinner and finer saw blades. For greater stability, the saw blade holder in the Gold series goes further into the handle. The manufacturer of these interchangeable blade saws is also known on the Japanese market for its extraordinary quality standards.

Fine saw with back, very fine tothing, especially suitable for step cuts and precise wood joints. Ideal for prong joints. The saws with the thinnest blades and the finest tothing.

Blade Length: 240 mm

Blade Thickness: 0.3 mm

Kerf Width: 1 mm
